

Objectives:

Improve water quality

Questions:

Is there sewage discharge to the creek and where are the locations? Do they have a permit?

How to limit new discharge permits?

What is the impact of cattle on water quality?

What is baseline quality of the creek?

What are the water quality problems and causes of degradation?

Need Government and Citizen Support and Interest

Objectives:

Implement a watershed plan to use as a guideline of action.

Inform the community to influence local decision makers. Need a unified vote.

Get involvement of watershed community in the planning process.

Wildlife Habitat and Management

Objectives:

Safe balance of wildlife (more species in balance with other species and appropriate habitat).

Questions:

Are there any unique habitat or species in the watershed?

How to control beavers?

How to control all animals and habitat (e.g. coyotes)?
