Subject: BMP identification input

Hello committee members –

Happy New Year! I hope everyone had an enjoyable holiday.

I'm writing to ask for your input as I work to expand the Aux Sable Creek Watershed website, now that a draft plan exists. One goal of the website is to provide information on practices happening in the watershed. As such, I'm looking to include information on various stormwater best management practices occurring in the watershed. I would appreciate information, particularly from those of you who are local government representatives, on BMPs that have been installed or approved in the watershed. Among those of most interest are those mentioned in the plan. (See a list below that I generated from the plan.)

If you have approved or installed BMPs in the watershed, would you let me know? I would appreciate receiving the following information on each one (if possible) by January 31, 2009:

- BMP
- location (subdivision or closest intersection)
- approximate date of approval/installation (month & year are just fine)
- landowner
- party responsible for on-going maintenance
- picture (if possible)
- other information you'd like to share

List of BMPs in the 2008 draft Aux Sable Creek Watershed Management Plan:

- Upland buffers
- Elimination of curbs and gutters
- Bioswales
- Rain gardens
- Infiltration galleries/basins
- Permeable pavements
- Stormwater wetlands
- Outlet detention wetlands
- Open water detention basin
- Dry bottom detention basin
- Conservation design
- Stormwater retention requirement
- Level spreader outlets
- Stormwater separators
- Deicing and anti-icing strategies
- Stormwater ordinance development or amendments
- Stream bank stabilization
- Revegetation
- Erosion control blanket/turf reinforcement mat
- Coir logs
- A-jacks
- Stone toe

- Stream barbs
- Rip-rap/Stone armoring
- Soil bioengineering

Thanks & let me know if you have any questions,
Stephanie
