

# Agenda

## November 20, 2007

### 1. Welcome/Introductions

### 2. Review

- a. **Goal:** to create a compiled open space plan for the Grundy County portion of the watershed
- b. **Definition of open space:** - this definition can take into account the varied types of open space, municipal & county, existing & proposed.
  - Areas devoid of buildings and structures, other than recreational and trail facilities and uses accessory thereto, that is in a natural or primarily natural state, contains significant environmental, ecological, aesthetic, or cultural features that warrant protection, and areas already permanently protected.
  - **Is this appropriate?**
- c. **Data** to include:
  - Rivers? (w/ buffer?)
  - Floodplains? (w/ buffer?)
  - Streams? (w/ buffer?)
  - Wetlands? (w/ buffer?)
  - Illinois Natural Areas Inventory (INAI) sites? – data not available
  - Forested areas?
  - Burial grounds? – no data available
  - Endangered species? – data available not useful
  - Historical sites? – is this important to open space protection?
  - Grasslands? – areas along RR, at minimum could have native plants – any local knowledge of this?
- d. **Map categories:**
  - Existing Open Space (preserved, public)
  - Existing Open Space (preserved, **private**) – such as CEs
  - Open Space Opportunities (as defined by government plans)
  - Additional Open Space Opportunities (ones recognized by committee, where a government entity has not yet identified it)
    - How can we be a bit more ambitious than the plans already adopted
- e. **Issues** checked following Oct. meeting:
  - All areas previously identified as “Existing Open Space” are now “Open Space Opportunity” – should match comp plan data
  - All areas previously identified as “Open Space Opportunity” are now “Additional Open Space Opportunity”
  - Minooka info should be corrected – anything else?
  - Channahon data – may not be shown yet, trouble integrating because no coordinate system with data – need a reference file like roads, etc. to match their data with the rest of this map.
  - Talked with Grundy County – discussed data & I think they are working on incorporating other data, as appropriate – anything else?
  - Touch base with Lyondell and Akzo Nobel representatives – 2 calls in to each one, no meetings set yet

### **3. Map discussion**

#### a. Review draft map

- Information included, to date
- What we're still working on
  - Channahon data, need reference point
  - Grundy data - any more to include?
- Map categories
  - Is data correct?
  - Other areas to discuss?

#### b. Additional Open Space Opportunities - discuss areas that are appropriate

### **4. Next (final) Meeting? - December 18<sup>th</sup>?**

### **5. Adjourn**
